overlapping with at least one transparent graphics object contained referenced in said transparency list.

11. (Original) The system of Claim 7, wherein said method further comprises:

generating a frame for each overlapping compound object in said transparency list, an overlapping compound object being formed by a transparent graphics object and non-transparent objects overlapping said transparent graphics object, said frame defining the area to be printed as a bitmap for printing the overlapping compound object.

12. (Original) The system of Claim 11, wherein said method further comprises:

generating said frame for each overlapping compound object as a composition of subframes.

13. (Currently Amended) A computer program product comprising computer program code for a method for processing a document page containing transparent graphics objects for printing, said method comprising:

creating a transparency list containing a reference to each of the transparent graphics objects of said document page,

wherein a transparent graphics object is an object, which does not obscure any other object that overlaps the object; and
determining whether said transparency list is empty;
converting only objects contained in referenced in said transparency list into bitmaps for printing upon said
determining finding said transparency list is not empty;
